

Europe's Core Utility for the Digital Financial Market

OPEN

NEUTRAL

COMPLIANT

UTILITY-BASED

Europe is Paving the Way for a Future-ready, Integrated Financial Ecosystem Leveraging Tokenization and DLT – the Momentum Is Now.

EUROSYSTEM APPIA ROADMAP

EU REGULATION

DLT Pilot Regime

EU framework allowing tokenized securities to trade and settle directly on distributed ledgers.

EU STRATEGY

Savings and Investments Union

EU strategy to deepen and integrate capital markets, mobilise savings and strengthen investment and competitiveness across Europe.

ECB / EUROSYSTEM

Appia Roadmap

Eurosystem roadmap for an integrated European tokenised financial ecosystem anchored in central bank money.

BIS

Project Agorá

Public-private initiative demonstrating programmable, atomic cross-border settlement using tokenised central-bank and commercial-bank money.

The Challenges – and How RL1 Addresses Them

01

From technology to compliance

DLT has proven its potential but has yet to strike the right balance between openness, neutrality and compliance. RL1 translates the technology into institutional infrastructure that is open and neutral, as well as compliance-optimized and predictable.

02

From fragmentation to shared infrastructure

Proprietary solutions and isolated ecosystems create fragmentation and limit adoption. RL1 provides a shared, standardised and interoperable infrastructure connecting institutions, applications and use cases on common rails.

03

From influence concentration to balanced governance

Public permissionless and proprietary networks can concentrate influence through economic stake, technical participation or ownership. RL1 is governed as a European cooperative with one member, one vote, giving every member institution an equal voice in shaping shared infrastructure.

OUR PURPOSE

An open, neutral, compliance-optimized
and non-profit DLT network for European finance.

Operated as a shared utility by a European cooperative — built for the benefit of its members.

RL1's Core Principles

01

Open

Open and non-discriminatory within the regulated financial ecosystem. Transparent, common eligibility and access rules enable qualifying institutions to participate on equal terms, while open standards and interoperability support connectivity across institutions, platforms and ecosystems.

02

Neutral

Neutral infrastructure without proprietary control. RL1 focuses on the common platform layer rather than competing with the assets, applications and services built on it. Cooperative governance prevents dependence on any single provider or participant.

03

Compliant

Institutional trust through compliance-by-design. Defined eligibility, transparent governance and infrastructure-level controls provide the security, integrity, auditability and regulatory alignment required for institutional-grade financial infrastructure.

04

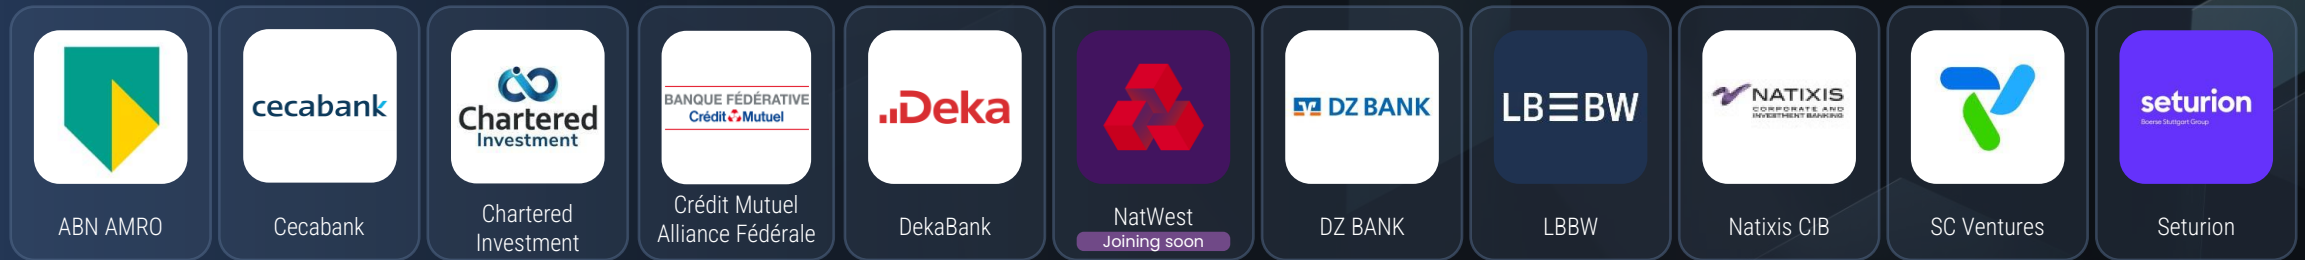

Utility-based

Shared infrastructure for the benefit of the market. RL1 brings institutions onto a common infrastructure layer while members and ecosystem participants compete and innovate on top. Cooperative governance aligns its evolution with the long-term needs of the industry.

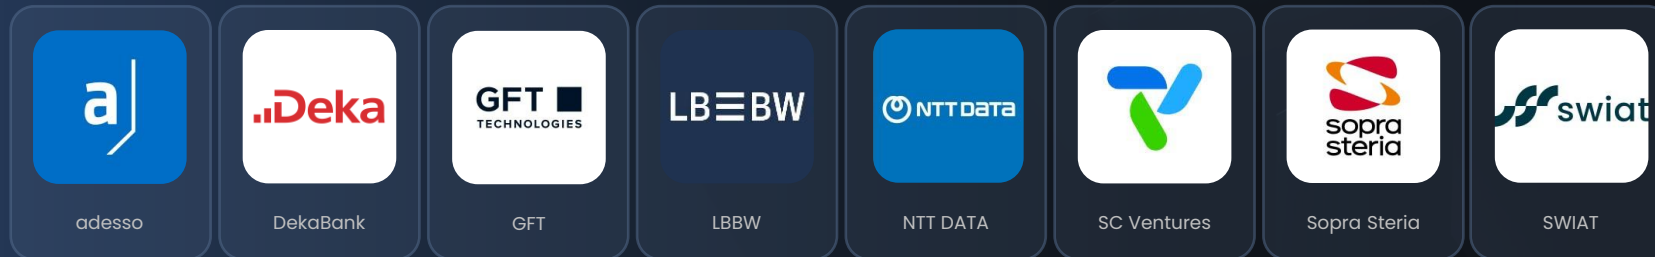

PARTICIPANTS

19 Institutions – One Network – More to Come

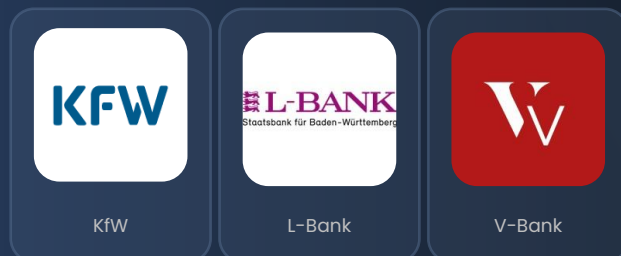

MEMBERS

VALIDATORS

SUPPORTERS

A Cooperative Structure for Shared Infrastructure

RLI is governed as an SCE — Société Coopérative Européenne — domiciled in Luxembourg. Every member institution has an equal voice.

General Assembly

All member institutions of the SCE — collective sovereign of the network

Supervisory Board

Elected by member institutions. Oversees strategy, governance and compliance.

Management Board

Elected by the SB. Is responsible for the company's day-to-day management, the development & execution of its business strategy.

A Cooperative Structure for Shared Infrastructure

RLI is governed as an SCE — Société Coopérative Européenne — domiciled in Luxembourg. Every member institution has an equal voice.

General Assembly

All member institutions of the SCE — collective sovereign of the network

Supervisory Board

Elected by member institutions. Oversees strategy, governance and compliance.

Henning Vollbehre
Managing Director

Our Ecosystem of Tomorrow

EVM-based and purpose-built for the instruments and operations that define regulated financial markets.

FIXED INCOME

Digital Bonds

Issue, settle and manage the full lifecycle of tokenized fixed-income instruments on a regulated network

ASSET TOKENIZATION

Tokenized Real-World-Assets

Bring off-chain assets on-chain with compliant, programmable ownership and transfer restrictions

TREASURY

On-chain Collateral

Move and optimize collateral in real time across counterparties and venues without manual intervention

DIGITAL MONEY

Stablecoins

Deploy regulated, bank-issued stablecoins with native settlement finality and redemption guarantees

SECURED FINANCING

Repo & Securities Lending

Execute and settle secured financing with atomic delivery-vs-payment & automated lifecycle management

RISK MANAGEMENT

Derivatives Margin

Automate margin calls and collateral movements for derivatives positions in real time

FIXED INCOME

Digital Funds

Automate subscriptions, redemptions and NAV calculations for tokenized fund shares with programmable rules

MONETARY INFRASTRUCTURE

Central & Commercial Bank Money

Interoperate between central bank digital currencies and commercial bank money on a single regulated ledger

JOIN NOW

Become a Member

RL1 is not a concept — it is live infrastructure. The cooperative is permanently open for new members. Join now and shape Europe's Financial Infrastructure!

ELIGIBILITY CRITERIA

- ✓ Licensed European banks & financial institutions
- ✓ Central banks and multilateral development bodies
- ✓ Market infrastructure operators and custodians
- ✓ Regulated asset managers and capital market participants

ONE-TIME FINANCIAL COMMITMENT

€550,000*

*Payable in two tranches: EUR 275,000 in 2026 and EUR 225,000 due January 2027.
An extra Aggio will be applied to New Joiners in 2027.
In addition, a further capital contribution of up to EUR 50,000 may become payable in 2028,
at the discretion of the Supervisory Board.

Equal Access

Join on equal terms

Access shared infrastructure under transparent, common rules and connect your applications, assets and services.

Governance Seat

Shape the infrastructure

Participate in cooperative governance and the evolution of RL1 alongside other members.

Compliance

Speed up onboarding

Benefit from common governance, controls and auditability designed to support compliance and institutional use cases.

Collaboration

Share the platform, compete on services.

Build on common infrastructure while focusing investment and innovation on differentiated products, assets and services.

JOIN NOW

Shape Europe's Financial Infrastructure

Regulated Layer One is formed as a cooperative. A selected group of institutions will set the rails for Europe's next generation of digital capital markets — this is your opportunity.
